WordPress Posts vs Pages

A **WordPress post** is what makes up the blog aspect of your site.

- These are generally news or informational updates about a certain topic or talking point.
- Posts are listed in reverse chronological order and can be tagged, categorized and even archived on your site.

- WordPress posts are what make up the RSS content of your WordPress blog. So, when someone subscribes to your RSS feed, your posts will be the content that's delivered to them.
- Think of the posts at the news portion of your site. They're dynamic and constantly changing the content your end users sees
